

Science Research Paper

Directions:

- If you do not have a science fair project, you need to select a topic and research information about it.
 - You need to write a research paper, **at least 5 pages long double spaced**, about one of the following topics.
 - Include at least **5 references**, listing them in APA format (use the website citationmachine.net to help you)
 - Prepare a presentation (PowerPoint, Poster, or board).
 - If you have been here since the beginning of the year, be aware that the research paper will be graded using the rubric for the science fair project. Therefore, you won't have any grade for "experiment."
 - **The paper and presentation are due February 4, 2016**

Topics:

1. Studying People Scientifically
 - a. Clinical Trials
 - b. The Scientific Method
 - c. The Nervous System
2. The Human Body
 - a. Artificial Limbs
 - b. Organs grown in the laboratory
 - c. The human heart/history of heart transplants
3. Cells
 - a. Animal Cells
 - b. Plant Cells
 - c. Infectious Diseases (pick any infectious disease)
 - d. Viruses/Vaccines
4. Genetics
 - a. Genetic Diseases (pick any genetic disease)
 - b. Genetic traits/ How they are passed down
5. Evolution
 - a. Endangered Species (pick any endangered species)
 - b. Invasive Species (Pick any invasive species)
 - c. Charles Darwin
 - d. The food chain
6. Any topic related to life science
 - a. Current Events
 - b. Scientists
 - c. Doctors
 - d. Any living species
